

OpenLabTwin: status and links

Every part of the lab system, and where to open it

29 September 2026 · Andrey Dyakov, IADE Tech Lab · [repo github.com/berlogabob/openlabtwin](https://github.com/berlogabob/openlabtwin)

Everything is live and nothing waits to be pushed. Since 26 September: smart storage and the spreadsheet import went live, students can request equipment ([/kit/](#)), the loan sheet reader and the database mirror run on the node, and **the showcase TV now runs on its own Raspberry Pi** with timed announcements. Open work is on the floor, not in code: counting the store, the first archive sheets, and testing the TV's power switching.

Part	Link	Checked
Schedule	https://berlogabob.github.io/openlabtwin/	200 live
Lab TV (QR and events)	.../openlabtwin/tv/?room=...Tech Lab (Oriente)	200 live
Calendar feed	.../openlabtwin/calendar/lab.ics	200 live
Book a consultation	https://berlogabob.github.io/openlabtwin/book/	200 live
Share an idea	https://berlogabob.github.io/openlabtwin/ideas/	200 live
Ask for equipment (new)	https://berlogabob.github.io/openlabtwin/kit/	200 live
QR codes to print	qr/book.svg · qr/ideas.svg	200 live
Staff office	https://berlogabob.github.io/openlabtwin/office/	200 live
A storage place (QR label)	.../office/?place=R15-L-S3	200 live
Schedule data	.../openlabtwin/data/all.json	200 live
Old site (until retired)	https://berlogabob.github.io/iade-lab-schedule/	200 still up

In the lab (local network and Tailscale)

Part	Link	Checked
Showcase TV, lab network	http://192.168.1.131/tv/?room=...	200 live
Showcase TV, Tailscale	http://techlab-01/tv/?room=...	200 live
TV computer (Pi 3 B, kiosk)	<code>ssh -i ~/.ssh/techlab tv@techlab-tv.local</code>	on the TV
TV media folder (Samba)	<code>smb://192.168.1.131/tv</code>	lab only
Loan sheet photos (Samba)	<code>smb://192.168.1.131/archive</code>	0 sheets yet
Edge node TechLAB-01 (SSH)	<code>ssh -i ~/.ssh/techlab TechLAB@techlab-01</code>	SSH ok

Part	Link	Checked
Node logs and backups	~/publish.log, ~/tv.log, ~/openlabtwin-backups/	backup 29 Sep
Database mirror	psql openlabtwin (on the node)	loaded 29 Sep
Unsloth Studio (AI, big PC)	http://192.168.1.42:8888 · desktop-vdsrh2e:8888	200 live
Repo on the Mac	~/Documents/GitHub/openlabtwin	in sync

Parts and their state

Schedule, filters, calendar feed (M1–2)	scraped every 6 h	Live
Office: bookings, approval, equipment (M3)	one picker for long lists	Live
Inventory: movements, stock, loans (M4)	210 movements	Live
Book me	no hours set yet	Live
Idea hub	51 ideas	Live
Equipment requests (/kit/)	class, lab work, take home	Live
Smart storage: codes, tags, stocktake	28 places, 38 to attend	Live
Spreadsheet import	140 items, 83 tagged	Applied 27 Sep
Edge node TechLAB-01	publishes every 10 min	Live
Read-only mirror on the node	rebuilt nightly	Live
Loan sheet archive reader	waits for first photos	Live, unused
TV showcase	5 pages in the loop	Live
TV announcements (every N s)	announcement01.png, 10 s of 30	Live
TV computer (Raspberry Pi)	boots into the TV page	Live
TV on/off over HDMI-CEC	set up, not tested on the Samsung	Pending
Video wall	github.com/berlogabob/videowall	Own repo
M5: demand forecast, Godot twin	place codes ready	Not started

Next, in order

1. TV: switch Anynet+ on in the Samsung and test on/off; note which video quality the footer settles on.
2. Retire the old site: push the ready branch `retire-to-openlabtwin` in `iade-lab-schedule`.
3. Count Room 15 and the Vitrine; add the –2 floor racks; set the cupboard rooms; record the PlayStation loans.
4. Photograph 3–5 old loan sheets, drop them in the archive share, check them in the office.
